Q & A

# Callout extensions

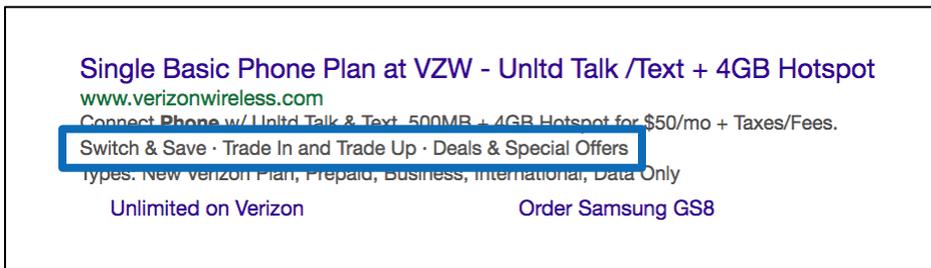

# Callout extensions

Callout Extensions provide an extra snippet of text that highlights the website's products or deals

Advertisers can enable 2-4 callouts per line, and the text cannot repeat what is already included in the ad

A list of phrases will be sent. **Partners need to concatenate them with a space - • - space**, like in the screenshot example.

Callout Extensions are not sent with a clickable link, but Partners can make this text clickable by adding the same link used in the headline (no other URL may be used and the white space may not be made clickable)

The screenshot shows a callout extension for a Verizon phone plan. The main headline is "Single Basic Phone Plan at VZW - Unltd Talk /Text + 4GB Hotspot" with the URL "www.verizonwireless.com". Below this, there are two lines of callout text: "Connect Phone w/ Unltd Talk & Text, 500MB + 4GB Hotspot for \$50/mo + Taxes/Fees." and "Switch & Save • Trade In and Trade Up • Deals & Special Offers". At the bottom, there are two links: "Unlimited on Verizon" and "Order Samsung GS8". A blue box highlights the callout text lines.

# **Review extensions**

# Review extensions

Review Extensions enable advertisers to share a positive review from a reputable third-party source

Advertisers can highlight a phrase from a flattering review, along with a link to the source of the quote

They can use a direct quote or paraphrase this text

Review Extensions are sent with a link to the third party source of the quote. Use this source link for the name of the source (i.e., "Better Business Bureau"), but apply the headline link to the text of the quote (i.e., "A+ Rated Service")

The screenshot shows a search result for '1st Time Home Buyer Loans - Rates Still Near Historic Lows' from lendingtree.com. The URL is [www.lendingtree.com/Mortgage/Loans](http://www.lendingtree.com/Mortgage/Loans). It has a 4.5-star rating. The review text is 'But Act Fast! Lock Into A Low Rate Mortgage Today Before Rates Jump Higher. Better Business Bureau, "A+ Rated Service"'. Below the review are two columns of links: 'Free Mortgage Calculator', 'Best Home Loans', and 'FHA Loans' on the left; and 'Today's Mortgage Rates', 'First Time Buyer?', and 'Refinance Mortgage' on the right.

# **4<sup>th</sup> line annotations**

# 4<sup>th</sup> line annotations

The 4th Line Annotation is a second description line that will contain the best annotation for the ad

This annotation is based on content from the ad's landing page and relevant to customer's search queries. It provides relevant and engaging at-a-glance information, such as product details or venue information, from reputable third-party sources

4th Line Annotations are not sent with a clickable link, but Partners can make this text clickable by adding the same link used in the headline (no other URL may be used and the white space may not be made clickable)

# Top ad annotations

# Top ad annotations

A Top Ad Annotation displays text regarding the number of user visits to the website over time

For an ad to be eligible for a Top Ad Annotation, the ad must receive a high CTR with a low occurrence of back-button clicks from users

The threshold for when a Top Ad Annotation will appear is dynamic as customer engagement changes over time

Top Ads are sent with the raw number of visits (i.e., `<adDomainClicks>113804</adDomainClicks>`). **Partners will need to translate this number** (i.e., 113,804) to a round number, like “100K+”.

Top Ad Annotations are not sent with a clickable link, but Partners can make this text clickable by adding the same link used in the headline (no other URL may be used and the white space may not be made clickable)

# Security badge annotations

# Security badge annotations

Security Badge Annotations add a “badge” to the ad to indicate that the advertiser’s website is secured by a third party security provider, like Norton or McAfee

This annotation increases user confidence in the advertiser’s website, thereby increasing clicks

Security Badge Annotations are not sent with a clickable link, but Partners can make this text clickable by adding the same link used in the headline (no other URL may be used and the white space may not be made clickable)

The screenshot shows a search advertisement for "Lowe's® Kitchen Remodel | Lowes.com". The URL "www.Lowes.com" is highlighted in green, and a blue box around it contains the text "Site secured by Norton". Below the URL, there is a 4.5-star rating for lowes.com. The main text of the ad reads: "Lowe's.com has been visited by 1M+ users in the past month. Start Your **Remodel** Today With a Free In-Store Design Consultation. Design your dream kitchen or bathroom with Lowe's."

# **Brand annotations**

# Brand annotations

Brand Annotation adds a brand label to an ad when eligible

This annotation enhances user confidence and can attract more clicks because of a higher perceived advertiser reliability

Brand Annotations are not sent with a clickable link, but Partners can make this text clickable by adding the same link used in the headline (no other URL may be used and the white space may not be made clickable)

# Smart annotations

# Smart annotations

Smart Annotations highlight specific products or brands featured on the advertiser's website

This annotation scans the advertiser's landing page and page title to pull categories, features or brand names, which help inform the user as to the content of the page

Smart Annotations are not sent with a clickable link, but Partners can make this text clickable by adding the same link used in the headline (no other URL may be used and the white space may not be made clickable)
