

**FOR A
BETTER LIFE**

May 10, 2018

Mr. Moynihan,

As Americans, we celebrated when Bank of America made a promise to stop financing the manufacture of military-style weapons for civilian use. We applauded your leadership.

Finally! A major corporation was doing the right thing and making the country safer. The decision was going to save lives.

Apparently, this was all too good to be true. We are angered to learn that you have flipped on your promise to the American people and you will continue to loan more than \$43 Million to Remington Arms during its bankruptcy, allowing them to continue to manufacture weapons like the AR-15 which killed so many in Newtown, CT.

When the children of Sandy Hook Elementary School were dying in their classrooms, it was because the killer had one of these assault weapons, made by the company you are bailing out.

We can't help but wonder why the next life taken by a Remington gun matters less to you than the profit you hope to turn with this financing. Lives are worth more than money. The rate of return on any investment should not be measured in funerals.

You have an opportunity to turn from this path. You have an opportunity to help lead us away from our culture of gun violence. You have an opportunity to revoke this loan. You have an opportunity to save lives.

For the next school full of children to land in the crosshairs of a Remington, we demand that you take it.

Sincerely,
The NoRA Coalition
